

Marine Safety Queensland P&P

How to apply for **Notification of Exemption Sailability Qld - licence & registration July 2012.pdf** from the Regional Harbour Master. SSCQ must do this with MSQ Marine Laws.

Step 1: At the start of every calendar year quarter the following email needs to be sent directly to Peter Kleinig at peter.e.kleinig@msq.qld.gov.au logging the following note for him to approve. Failure not to do this will mean SSCQ does not to comply with the rules set down by MSQ for an organisation such as SSCQ to apply of an events permit to sail within Mooloolaba Harbour waters and a fine will apply if we conduct our normal sailing sessions.

Hello Peter,

Attached is the Log for SSC sailing sessions (state specified months and year exemption is required for required). Sailability One/Two using VHF transceivers locked to Channel 77. Operating times 0700/1330 both sessions.

Thanks (your name)

Attached to the note needs to be the following:

(These attachments are located in the MSQ file)

Step 2: Peter Kleinig will send SSCQ this Notification of Exemption.

Thank you for your email advice below.

On behalf of the Regional Harbour Master (Brisbane), I am pleased to approve the operations of the recreational ships for the Sailability Sunshine Coast sailing sessions you describe, on the conditions set out in the exemption.

(See attached file: Notification of Exemption (Sailability Qld - licence & registration) July 2012.pdf)

Please ensure a copy of the exemption and your safety documents are kept on board the participating ships for the duration of these events, and can be produced to a shipping inspector if requested by one.

Please also remind the owners and masters of all ships that, despite anything contained in the exemption and the safety documents, it is their general safety obligation to ensure their ships are safe and that they then operate those ships safely.

I have also sent this email to the District Officer of Queensland Boating and Fisheries Patrol at Mooloolaba and the Officer in Charge of Sunshine Coast District Water Police, so they're aware of the events and the use of the recreational ships as well.

If you have any queries, please give me a call.

Yours sincerely Peter Kleinig Area Manager (Sunshine Coast) | Maritime Safety Queensland

Step 3: A copy of the Peter Kleinig approval must be filed into the water proof document holder located on Sailability 1&2 to show we comply.

This system has been put in place after consultation between Sailability Queensland and Marine Safety Queensland to avoid additional cost and inconvenience to all Sailability Clubs throughout Queensland waterways.
